Address : House No A41, Street 5, Latifi Housing Society Block A, Gulistan e Jauhar Block 20, Karachi Pakistan.

## Work Experience

### Product Development Engineer - Team Lead

HBL - Habib Bank Limited / Karachi Pakistan (Feb 2023 - Present)

- Collaborating closely with stakeholders to understand business requirements and effectively translate them into technical requirements for the development team
- Understand business requirement and review features drafted by PO. Assist PO's in identifying system functionalities, dependencies and gaps (if any) for solution delivery.
- Planning and documenting comprehensive technical specifications for features or system design, ensuring a clear roadmap for development and implementation
- Conduct and share impact analysis for the feature / changes / bugs in discussion
- Designing, building, and configuring applications to meet business process and application requirements, leveraging technical expertise and problem-solving skills
- Highlight dependencies, risk and impediments to PO's and SMs on priority basis.
- Directing the development team in all aspects of the software development life cycle, including design, development, coding, testing, and debugging, to deliver high-quality solutions covering all functional and non-functional requirements, including performance, security, scalability and usability
- Writing testable, scalable, and efficient code to deliver high-quality solutions
- Conducting code reviews and unit test cases providing constructive feedback to ensure code quality and adherence to best practices Mentoring and guiding junior team members, fostering their professional growth, and encouraging the adoption of industry best practices
- Ensuring that software quality standards are met by enforcing code standards, conducting rigorous testing, and implementing continuous improvement processes
- Collaborating with cross-functional teams to align technical solutions with business goals and deliver effective and impactful software applications
- Develop technical documentations as applicable for future reference and audit purposes as applicable.
- Participate in daily PI planning, backlog refinement, team sync, iteration planning, retrospective and inspect and adapt meetings to ensure alignment with the Agile process.
- Support agile team during ART events i.e. PI planning, Team Sync, Iteration planning and review etc.
- Design and develop platform architecture in a way that it supports continuous integration and continuous deployment (CI/CD) pipelines.
- Attend team backlog refinement sessions and share holistic feedback clearly.
- Provide releases and artifacts (as applicable) related to the planned release against feature / change for QA or production deployment to Release Manager / QA team in the timely manner
